

BioGreen™ Fabric Conditioner

ITEM #3003

BIOGREEN'S FABRIC CONDITIONER is so popular and after you read this you will agree. It has such a wonderful clean scent with no heavy perfumes to irritate allergies and breathing problems. This product works incredibly, cuts down on static electricity, releases wrinkles and makes everything soft, naturally.

One bottle of **FABRIC CONDITIONER** makes five bottles of product; you simply dilute it, 5 parts water to 1 part **FABRIC CONDITIONER** and add it right to the washer or fill a squirt bottle according to directions on bottle of **FABRIC CONDITIONER** and squirt right into dryer on clothes. **FABRIC CONDITIONER'S** main ingredient is Soybean Oil. It is natural and safe for our family and our water supply. The popular TV show 60 Minutes had a segment that showed what happens when you use the tear-off dryer sheets that are sold in stores. Using these sheets puts an extremely flammable film on the fabric of your clothes. It goes up in flames like gasoline, because it is coated with a petroleum-based ingredient. Dryer sheets can also irritate allergies and breathing problems. **BIOGREEN'S FABRIC CONDITIONER** does not leave a flammable film on your laundry. Our **FABRIC CONDITIONER** is safe and extremely economical.

Here are some more uses for FABRIC CONDITIONER:

FABRIC CONDITIONER mixed 10:1 in a spray bottle is an incredible ironing spray. Makes fabrics easy to iron with a light starch-like finish.

FABRIC CONDITIONER can be sprayed directly on most surfaces to remove static electricity, for example; carpets, socks, slacks, skirts, pantyhose and even your hairbrush to get ride of static electricity in your hair.

FABRIC CONDITIONER is made from soybeans so it's not only nontoxic but also it supports the farmers of America.

FABRIC CONDITIONER mixed 5:1 is a great furniture polish and dust cloth spray. It gives a high shine and decreases dust attraction. Use on your floor dusters and dust mops too.

FABRIC CONDITIONER INGREDIENTS:

DEIONIZED WATER, NATURALLY DERIVED (SOYBEAN) CATIONIC CONDITIONING AGENTS, NATURAL FRAGRANCES.
