Mega C Plus

Study after study has shown that antioxidants are necessary for good health, and Vitamin C is the body's chief water-soluble antioxidant. But this vitamin does more that fight free-radical damage. Among its other critical functions, it helps the body recycle the building matrix for our connective tissues, cartilage, tendons and blood vessels; it is necessary for the efficient production and activation of immune cells and respiratory function; and it aids in the neutralization of histamine, the main biochemical culprit in allergy attacks. It's extremely difficult to get sufficient amount of Vitamin C from our diet alone. And, because Vitamin C is water-soluble, it's level in our bodies must be replenished daily. Supplementation is a simple and more accurate way to meet your daily Vitamin C requirement. MEGA C PLUS contains Bioperine, a form of black pepper that has been shown to improve the absorption of Vitamin C by as much as 39%. In other words, you get up to 39% more Vitamin C with BIOGREEN'S MEGA C PLUS.

What it does...
Vitamin C is active throughout the body. It helps strengthen the capillaries (the tiniest blood vessels) and cell walls and is crucial for the formation of collagen (a protein found in connective tissue). In these ways, Vitamin C prevents bruising, promotes healing and keeps ligaments (which connect muscle to bone), tendons (which connect bone to bone), and gums strong and healthy. It also aids in producing hemoglobin in red blood cells and assists the body in absorbing iron from foods.

Latest findings...
Vitamin C may help prevent reblockage (restenosis) of arteries after angioplasty (an alternative to bypass surgery). A study of 119 angioplasty patients found that restenosis occurred in just 24% of those who took 500 mg of Vitamin C per day for four months, compared with 43% of those who did not take the vitamin.

MEGA C PLUS has been specifically formulated with 4 forms of Vitamin C to provide an advanced highly absorbable supplement. This unique formula is buffered to be gentle to your stomach. In addition MEGA C PLUS utilizes 3 different bioflavonoids. Bioflavonoids increase your body's ability to absorb and utilize Vitamin C and are powerful antioxidants themselves.

MEGA C PLUS Ingredients:

Vitamin C
(as calcium ascorbate, ascorbic acid, magnesium ascorbate, potassium ascorbate) 500 mg

Bioflavonoid Complex
(as lemon bioflavonoids, hesperidin, rutin) 40 mg

Bioperine (fruit)
(piper nigrum, dried hydro-alcohol extract, 95% piperine) 2.5 mg

Citric Acid 150 mg

Other Ingredients:
Dicalcium phosphate, microcrystalline cellulose, croscarmellose sodium, silica, magnesium stearate

Serving Size: 1 Tablet
